

Perrine Coulee Wetland 319 Project (Snake River CD)

ProgramWater Quality ImplementationLead ImplementerSnake River Conservation District

Funders Idaho Department of Environmental Quality, Snake River Conservation District, Twin

Falls Canal Company

Other Organizations U.S. Environmental Protection Agency, U.S. Natural Resources Conservation Service

Project Primary Contact DeeAnn Scott (deeannscott@cableone.net)

Project Stage Completed
Duration 2004 - 2005

Natural Resource Projects & Practices > Water Quality Implementation

The project is to reduce pollutant loading of the Main Perrine Coulee & the Middle Snake River. In so doing, achievement of beneficial uses and/or state water quality standards can be accomplished.

Please note: project location identification has either been authorized by property owners and/or project is not subject to confidentiality under USDA 1619 farm bill security provisions.

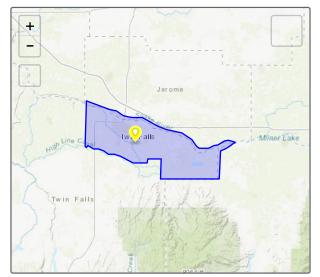

Key Accomplishments

- Sediment Basin (cubic yards): 72,000 cubic yards
- Sediment Basin (number): 2

Project Themes

- Agricultural Lands
- Habitat and Species
- Healthy Watersheds
- Water

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
